

# CAN-AM NARROW FLIP-DOOR CABINETS & NARROW SHELVES

## NARROW FLIP-DOOR PULLOUT CABINETS

These narrow cabinets work just like our standard width pullout cabinets, but narrower! Line them up next to your standard cabinet setup or combine them to reach virtually any width or height.

Optional Pullout and Stationary Shelves provide the flexibility to create versatile AV or computer setups - with keyboard trays and rollout work surfaces at just the height you want them. For extra security and peace of mind, an optional key lock is available.

Outfit them with LEGS for lift or WHEELS for mobility.

### FC14X24 - Narrow Flip-Door Cabinet

Just like FDCAB14 - but narrower! Ideal for AV components, as part of a narrow computer setup, or if you need some breathing room in a larger configuration. Lines up alongside any of our 14.5" cabinets. FC14X24 is equipped with series of slats that will accept our optional pullout or stationary shelves. Slats are spaced at 1.5" centers, making efficient use of space. Place shelves right where you need them. The rear cutout lets you stay connected.

**SPECIFICATIONS:** Weight: 30 lbs  
Cabinet Dimension: 23.5"W x 14.5"H x 20" D Inside Dim: 21.5" W x 11.5" H x 20" D Finish: Baked on powder coat.

### FC20X24 - Narrow Flip-Door Cabinet

Just like FDCAB20 - but narrower! This 20.5" high cabinet provides even more room for your AV or computer components, and lines up alongside any of our other 20.5" high cabinets. FC20X24 is ideal to keep sensitive stereo or computer equipment dust free and out of sight.

FC20X24 is also equipped with series of slats that will accept our optional pullout or stationary shelves. A stationary shelf (ASHELF24) and a pullout component shelf (PUSHE24) is the most popular configuration - but the freedom is yours to use this cabinet for whatever you need.

**SPECIFICATIONS:**  
Weight: 36 lbs Inside Dim: 21.5" W x 17.5" H x 20" D  
Cabinet Dimension: 23.5"W x 14.5"H x 20" D Finish: Baked on powder coat.

### FLIP-DOOR CABINET FEATURES

- Adjustable feet levelers provide stability and lift the cabinet off the floor. The levelers rest in dimples topside for positive positioning when stacking
- Series of slats accept optional narrow shelves
- Large wire cutout lets you stay connected
- Includes hardware for connecting when stacking.

### NARROW SHELVES These shelves work exclusively in the narrow flip-door cabinets above

#### ASHELF24 - Narrow Stationary / Base Shelf

ASHELF can be used as a base station, or as a stationary shelf. It only takes up 1" of height in your cabinet, so it can be useful in tight situations.

Levelers protrude through the bottom of all pullout cabinet floors and therefore a shelf that creates a false floor above those levelers is recommended.

As a base shelf, ASHELF rests on the levelers and creates a false floor flush with the bottom lip of the cabinet.

21" W by 1" H by 18" D ~ 7 lbs

#### PUSHE24 - Narrow Pullout Shelf

Exactly the same as our standard width pullout shelf - but narrower! It makes wiring a breeze and is the ideal place to put a keyboard, laptop, printer, top loading CD carousel or turntable. 21" W by 2" H by 18" D ~ 9 lbs

#### MINDW24 - Narrow Mini Drawer

Just like our standard Mini Drawer - but narrower! Just the height for smaller items - but strong enough for whatever will fit. 21" W by 2" H by 18" D ~ 9 lbs

*This stack features FC20X24 with three PUSHE24, and is on an M3D20X24 cabinet*

### How Do Narrow Cabinets Measure Up?

Narrow cabinets line up with their standard width 14.5" or 20.5" high counterparts, as they are the same height and depth - just narrower! Narrow cabinets can only be stacked on other narrow cabinets.
